

FGG Condemns the Spate of Hate Crimes Against Asians: We Must Not Let Hate Define Us

SAN FRANCISCO, CALIFORNIA, USA, 18 March 2021

FGG stands in support of the Asian community experiencing a swell of racism, xenophobia and misogyny.

We are saddened, shocked and sickened by the growing violence against the Asian population around the world, and our thoughts and prayers are with the 8 who lost their lives on March 16 in Atlanta and the loved ones they leave behind.

Such acts are senseless and are fuelled by an insidious narrative spread by those who do not lead with love and who, despite their protestations, do not have the best interests of the many at heart but only their own.

We, as a human race, are united not by our likeness but by our differences. Diversity is a seminal part of what it means to be human. Innovation, change, progression and growth simply would not happen without the sound of varied voices and the sight of many eyes providing different perspectives.

These crimes energize FGG in its continued commitment to using its voice and platform to provide education and a space that is safe, embracing and fully inclusive to all to end discrimination, racism and hatred in all its forms.
